Mission Statement

To develop IFRS[®] Standards that bring **transparency**, **accountability** and **efficiency** to financial markets around the world.

Our work serves the public interest by fostering **trust**, **growth** and **long-term financial stability** in the global economy.

Adoption of IFRS Standards

 = IFRS Standards required

126 of 150 jurisdictions require IFRS Standards for all or most publicly accountable companies

Challenges to financial reporting

Gap between book value and market value

Disclosure overload

Big data, artificial intelligence

Exploding sustainability reporting

Keep calm and carry on

**Financial reporting
will remain the main
anchor for investors**

**Big data
supplemental, rather
than competitive**

Period of calm needed

IFRS Practice Statement *Making Materiality Judgements*

Gathers in one place all the requirements on materiality from IFRS Standards and adds practical guidance and examples

Objective

Provides reporting entities with guidance on making materiality judgements when preparing financial statements in accordance with IFRS Standards

Form of the guidance

The Practice Statement does not change any existing requirements nor introduce any new requirements; it is a non-mandatory document developed by the Board

Primary Financial Statements – scope

13

Statement(s) of financial performance	Statement of cash flows	Statement of financial position	Statement of changes in equity
Requiring additional EBIT subtotal	Eliminating options (interest/dividends)	No planned change – except possible development of template for primary financial statements and greater disaggregation	
Providing guidance on presentation of management operation performance and alternative EPS	Aligning the operating section between the statements of cash flows and financial performance		
Better ways to communicate OCI	Requiring a consistent starting point for the reconciliation		

What the IASB cannot do

- Leadership in sustainability reporting
- Public authorities need to take the lead
- Reporting not the best catalyst for change
